

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

CFP Castlefield Thoughtful UK Smaller Companies Fund G Income

This Fund is managed by Conbrio Fund Partners Limited

ISIN (Income): GB00B1XQNH95

Objectives and Investment Policy

The investment objective of the Fund is to achieve long term capital growth, which is superior to the median performance of all of the funds forming the official peer group of which the Fund is a part. 'Peer group' is defined as being the Investment Association sector to which the Fund has been allocated (currently being the UK Smaller Companies sector) or to which it may be allocated in future, as determined by that body. Long term means over rolling five year periods. The Fund will invest at least 80% in a portfolio of smaller companies that are domiciled, incorporated or have a significant portion of their business in the UK and which the Investment Adviser considers to offer opportunities for capital growth, selected in accordance with the Investment Adviser's "thoughtful investor" approach (as set out in the Investment Approach below). These smaller UK companies may also be listed in the UK, including those quoted on the Alternative Investment Market. The Fund may also invest in money market instruments, units and/or shares in other collective investment schemes, deposits, warrants, cash and near cash.

Investment Approach

The Fund's investible universe is geographically constrained but sector agnostic. To select companies offering opportunities for capital growth over the long-term, the Investment Adviser applies its proprietary "thoughtful investor" investment approach, developed in tandem with its clients, which comprises:

1. the application of exclusionary screens;
2. applying the Investment Adviser's proprietary B.E.S.T. framework; and
3. ongoing stewardship activities.

Exclusionary screens

The Fund will not invest in any enterprise or company if more than 10% of its revenues or profits (whichever is the greater figure) derive from:

- manufacture and distribution of weapons and related systems • nuclear military exposure • nuclear power generation • mis-marketing of infant milk formula • extraction or processing of fossil fuels • production and retailing of fur products • animal testing
- manufacture and retailing of alcohol • gambling • pornography • tobacco • high interest-rate lending • mining.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 6 due to the volatility of the Fund price which sits in a range of between 15% and 25%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

• This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

• The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

• The lowest category does not mean 'risk free'.

• This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

• The Fund holds equities concentrated both in number and in location in the UK. Equities tend to experience higher volatility than many other asset types such as bonds or money market instruments. Funds concentrated in one geographic location are more vulnerable to market sentiment in that specific location and can carry a higher risk than funds holding more diversified assets.

• Liquidity risk: during difficult market conditions some securities, such as structured investments, corporate bonds and positions in emerging markets, may become more difficult to sell at a desired price.

• Counterparty risk: arising from securities which require a specific entity, usually a large bank, to honour its obligations to the Fund.

• Operational risk: arising from investments in overseas markets, in particular emerging markets countries, which may not have the same level of safekeeping and other controls as UK markets.

• Legal or tax risk: arising from a change in legal regulations, tax rules or the application of them.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge	None
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out

Ongoing charges	0.94%
------------------------	--------------

Charges taken from the Fund under certain specific conditions

Performance fee	None
------------------------	-------------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

- The Fund launched in 2007
- The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance
- Past performance has been calculated in pounds sterling
- Performance will be calculated as Total Return, including all charges levied against the Fund
- Past performance has limited value as a guide to future performance
- Investments may go down as well as up

Performance source: Morningstar Direct
