Investment Policy: The fund will invest at least 70% of its assets in the shares of UK companies.

The fund may invest up to 30% of its assets in companies incorporated anywhere in the world including emerging markets. The fund will invest at least 70% of its assets in the shares of companies in which a majority of business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more SDGs.

UK companies are either incorporated, domiciled, or have significant business activities in the UK.

SDGs are a series of goals that recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health, education, economic growth, a reduction in inequalities, while tackling climate change and working to preserve the planet's oceans and forests.

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

Additional information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund. The fund's performance can be compared to the FTSE All Share (Gross total return) Index.

Risk and Reward Profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high.
