- The Fund is actively managed and seeks to achieve its investment objective by investing in a combination of shares (80-90% of the Fund's investments) and bonds (issued by companies and entities which are not companies, such as government-related entities) (10-20% of the Fund).

- Climate considerations: At least 70% of the Fund's assets will meet at least one of the Climate Considerations for company shares, corporate bonds and sovereign bonds:

Scope 3 emissions are not included.
- Sovereign climate considerations: When purchasing sovereign bonds for the Fund, the Manager will consider whether the relevant country's sovereign carbon intensity is at least 25% lower than the average carbon intensity of the sovereign constituents within the Composite Index.
- The Fund can hold investments that do not meet the Climate Considerations and certain investments are not subject to any Climate Considerations. The Fund will not invest more than 30% of its value in assets that do not demonstrate any of the Climate Considerations.
- Exclusions: The Manager seeks to avoid investing in companies involved in and/or deriving revenue (above a threshold specified by the Manager and set out in the exclusions policy at <https://fund-docs.vanguard.com/VanguardActiveLifeClimateAwareRangeExclusionsPolicy.pdf>). The Manager will not invest in sovereign bonds issued by countries where the fuel exports for the relevant country exceed 50% of total exports.

## Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging is not guaranteed to completely eliminate currency risk.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

**The risk and reward indicator does not take account of the following risks of investing in the Fund:**

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Sustainability risk. The Fund may not make certain investments if they do not meet the Fund's Sustainability Approach. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.
