Janus Henderson

Global Sustainable Equity Fund Class I Inc ISIN: GB0005030043

A sub-fund of Janus Henderson Sustainable/Responsible Funds, a UK OEIC managed by Janus Henderson Fund Management UK Limited. Fund Currency: GBP Share Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide capital growth over the long term (5 years or more) by investing in companies that the Investment Manager believes contribute to positive environmental or social change by reference to the sustainability themes. The Investment Manager has identified nine environmental and social sustainability themes that it believes will help drive a sustainable global economy by addressing current global challenges such as population growth, ageing population, resource constraints and climate change. The Investment Manager will invest in companies whose products and/or services are aligned with the sustainability themes.

Investment policy

The Fund invests at least 70% of its assets in shares (also known as equities) of companies, of any size, in any industry and in any country, provided that such companies are not excluded by virtue of the applicable exclusions and meet the Fund's sustainability standard. Whether a company provides sustainable products and/or services, and therefore whether it is a sustainable company for this Fund, will be determined by a robust evidence-based standard, which requires the majority of each company's current revenues (at least 50%) to be aligned to a single sustainability theme.

The Fund may also invest up to 30% of its assets in other assets including: (a) companies that have less than 50% revenues aligned to the sustainability themes or have revenues which the Investment Manager considers as enhancing quality of life and which are not considered to conflict with the sustainability themes; (b) companies that derive at least 50% of prospective revenues from products and services that contribute to positive environmental or social change; (c) Collective Investment Schemes (including those managed by Janus Henderson); and (d) cash.

The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the MSCI World Index. The index represents the most appropriate and useful comparator for assessing the Fund's performance because there is a high degree of overlap between the constituents of the index and the initial investible universe of the Fund, but the index does not define the Fund's investment universe. The Investment Manager has discretion to choose investments for the Fund that are not in the index or with weightings that are different compared to the index.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 5 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Smaller Companies Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.

Investment Style - Growth The Fund follows a growth investment style that creates a bias towards certain types of companies. This may result in the Fund significantly underperforming or outperforming the wider market.

As an additional means of assessing the performance of the Fund, the IA Global sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The Fund pursues its objectives by investing in sustainable companies that the Investment Manager believes contribute to positive environmental or social change and which have attractive financial prospects based on detailed analysis of financial statements and forecasted cash flows. The Fund has a bias towards "growth" equities. The "growth" approach emphasises investments in companies the Investment Manager believes have the potential for above-average earnings growth. Examples of themes the Investment Manager has identified include efficiency, cleaner energy, water management, environmental services, sustainable transport, sustainable property & finance, safety, quality of life, knowledge & technology and health. More product-specific information, including our investment principles, can be found in the Document Library of the website at www.janushenderson.com. Further information as to how Janus Henderson approach ESG, including Janus Henderson's "ESG Investment Policy", can be found at www.janushenderson.com/esg-governance.

Other Information The Investment Manager will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the Investment Manager considers could contribute to significant ESG harm, as further described in the prospectus.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Sustainable Investment Due to the Fund's Sustainability Approach, it may exclude or invest less or more in certain companies and may therefore perform differently to funds that have a similar financial objective, but that do not have a binding Sustainability Approach. Political, regulatory or investor sentiment about sustainability initiatives may change over time and impact the Fund's performance.

Derivatives Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges	0.85%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 30 September 2025. Ongoing charges may vary from year to year. The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund and the share class were launched in July 1991.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the benchmark.
